# MANDATEWIRE

## MandateWire Real Time Alert Tutorial

## 1. Choosing your criteria

Setting up real time alerts allows you to get more out of MandateWire. You can set up an alert which will notify you of any new intelligence added to the platform that fits your criteria and areas of interest. This is done in a few simple steps:

#### Choose your search criteria

1

You can narrow down the available reports to show only the specific areas that match your interest.

The level of customisation within the search is very high - allowing you to very clearly define and set up searches which find you only what you are looking for. You can refine by categories including asset class, investment activity, investor details, etc.

#### 2 View your chosen criteria

The criteria you have selected is summarized at the top of the page, providing full visibility of the search.

## 2. Saving your search

Save your search and create an alert

At the top right of the page - click the "Save/ Alert" button.

- a. Give the search a title so that you know what it relates to.
- b. Tick the button to agree to email alerts
- c. Click Save

## 3. Using your searches

You have successfully set up your alert! You will be alerted to all relevant intelligence from the MandateWire network as soon as it's published. This will give you a competitive edge in starting conversations with relevant investors ahead of your competitors.

#### 4 Finished!

Additionally - if you wish to search by the same criteria again when you login to the platform - you can use the Your Searches box at the top of the Advanced Search section to repeat the search.
